

## 2021 Event Series

# Actualizing Equity in Environmental & Climate Justice

Envisioned by the Climate Justice Alliance, *Just Transition* is a framework focused on shifting from an extractive economy to a regenerative economy. As we emerge from a year of intense COVID restrictions, we know this moment must be a pivot toward the just transition necessary to address the growing climate crisis and repair generations of extraction and environmental harm to communities of color.

At our May 2021 Actualizing Equity event we discussed just transition with Janiece Watts (Fresh Energy), Sam Grant (MN350), Robert Blake (Solar Bear), mk nguyen (Nexus Community Partners) and Emilia Gonzalez Avalos (Unidos MN).

# Just Transition Resources

## Extractive Economy

## Regenerative Economy

### [Climate Justice Alliance Just Transition Principles](#)

Recognizing the contributions of the Principles of Environmental Justice and Jemez Principles for Democratic Organizing, the Just Transition principles are an attempt to consolidate and synthesize various Just Transition principles from among Climate Justice Alliance members and allies, built off the deep work and discussions. Understanding that Just Transition will look different in different places, CJA believes a core set of shared principles can strengthen our collective work.

### [Indigenous Environmental Network Indigenous Principles of Just Transition](#)

The Indigenous Environmental Network compiled a set of Indigenous-based principles outlining what Just Transition means to Indigenous peoples on Turtle Island, drawing on the contributions of the many tribal voices of Indigenous Peoples that came to the Protecting Mother Earth Conferences from 1990 to 2010, and focused in three areas: Responsibility and Relationships, Sovereignty, and Transformation for Action.

### [Movement Generation A Strategic Framework for a Just Transition](#)

Offered in English and Spanish, this zine is a 32-page long training tool that offers a framework for a fair shift to an economy that is ecologically sustainable, equitable and just for all its members, full of visuals, stand-alone sections, and curriculum ideas. In 2020, Movement Generation also offered “Course Correction,” a virtual course focused on just transition and the COVID-19 crisis; the recordings and materials [are available online here](#).

## Paths toward a Just Transition

### [The Red Deal: Indigenous Action to Save Our Earth](#)

“The Red Deal is a program for Indigenous liberation, life, and land—an affirmation that colonialism and capitalism must be overturned for this planet to be habitable for human and other-than-human relatives to live dignified lives.”

### [The Red, Black and Green New Deal](#)

“The RBG New Deal puts Black liberation at the center of the climate struggle, and addresses the impact of climate change and environmental racism on Black communities, proposing immediate actions to fortify Black people from the uniquely racist practices of the fossil-fuel industry.”

### [MN: Just Solar Returning Citizens Initiative](#)

This initiative supported by Solar Bear trains formerly incarcerated people in solar installation and site evaluation, challenging the prison-industrial complex by providing solutions for a renewable future that improve the lives of returning citizens, and the public.

### [MN: Missing and Murdered Indigenous Relatives](#)

This initiative of MN350 is combating the epidemic of missing and murdered indigenous women, girls, and relatives through education and outreach aimed at informing neighbors and lawmakers about the epidemic — and providing pathways to solutions.
